# Ask for a part by voice

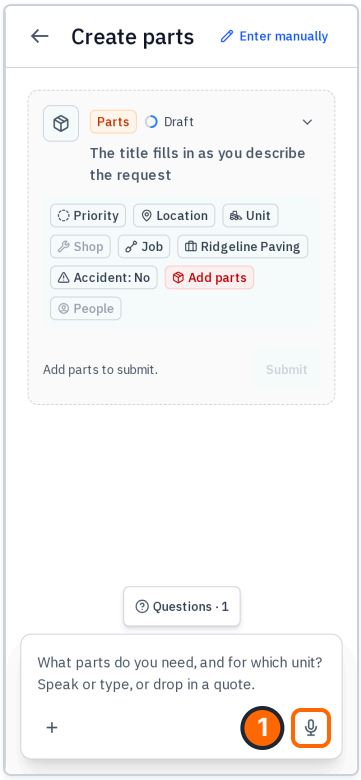

Say what you need. Gearflow fills in the request: the part and quantity, the unit, the priority, the location and if the machine is down.

BEFORE · PARTS HUB

Before, **Speak to Add Parts** listed the parts. You picked the machine, urgency and location on other screens. *Redrawn from the old screen.*

NOW · GEARFLOW

1. Tap the round **+** button at the bottom right, then **Create request** › **Parts request**. Tap the microphone (**Record a voice memo**).
2. Say the part, how many, the unit number and where you are. Say if the machine is down. Tap stop when you finish.
3. Check the card: the title, the part and quantity, the unit, the priority, the location and **Machine down**. Tap a chip to change it.
4. When the card reads **Ready to submit**, tap **Submit**.

**Tip:** You can also type the same sentence in the box. To fill in a form yourself, tap **Enter manually** (sheet 3).

**What changed:** One sentence fills the whole request, not only the parts list.
