Compare the quotes and pick one

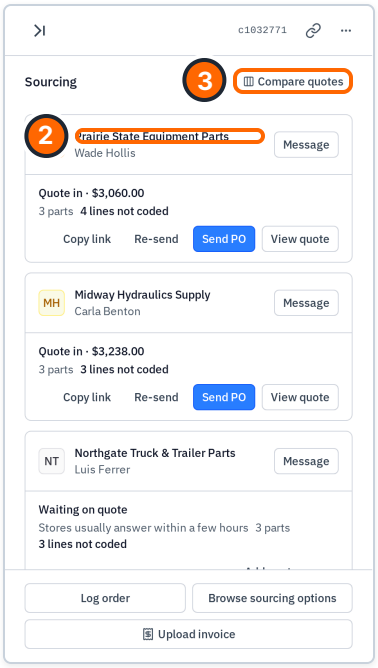

Your mechanics send each request to vendors. The quotes come back on the request: compare them part by part and accept the best.

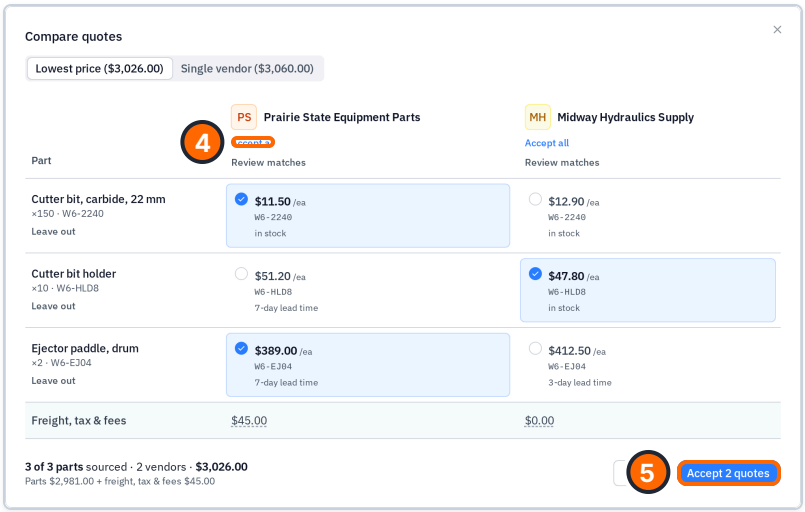

BEFORE · PARTS HUB

Before, each vendor's quote was a separate **Open Quote** card with only its total. *Redrawn from the old screen.*

NOW · GEARFLOW

1. In **Parts**, open the **Quoted** tab and tap a request.
2. Under **Sourcing**, each vendor shows its quote total, or **Waiting on quote**.
3. Tap **Compare quotes**. Each column is a vendor, and each row is a part, with its price and lead time.
4. Pick a vendor for each part, or tap **Accept all** for one vendor. **Lowest price** picks the cheapest for each part.
5. Tap **Accept** at the bottom. It shows how many quotes you accept. Then send the PO (sheet 2).

Tip: A vendor that has not answered yet shows **Waiting on quote**. Use **Re-send** on its card to ask again.

What changed: Quotes are compared line by line, with the price and lead time for each part, not only as totals.
